"Back to God's Country"

*With Renee Adoree
Story by Curwood*

BACK TO GOD'S COUNTRY—to the valley of peace and plenty—to love and repose and sunshine and leisure—that was her dream and his—

BUT—Fate snapped the whip and the yellow fangs of lust and desire reached out to strike her—

It's a burning, gripping, searing story of one woman's courageous battle against terrible circumstance, seething passion of the angry elements—a gorgeous, dramatic panoama of frozen wastelands the snow country.

THIS WEEK

Hoot Gibson in "The Wild West Show."

Final Preparations For Erection New School

A meeting of the School Board was held on Monday night and was attended by T. K. McNeill, contractor for the new school and the City Engineer of Lethbridge, who earlier in the afternoon had assisted in staking out the building site. Active operations in putting up the building will begin at once.

Chautauqua Example Successful Co-operation

The ever-increasing success of co-operative movements in the Dominion of Canada is a well known fact. The Canadian Chautauquas, as a co-operative movement, have shared in this conspicuous success. This year two new circuits will be added to those already in operation, which means that at least one-third more the number of towns served last year will have the Canadian Chautauqua service.

Something like twenty-five thousand of the leading citizens west of the Great Lakes are earnestly cooperating in order that they may meet the needs of the people through the medium of this institution. Even in the larger centres of Eastern Canada Chautauqua has proved to be a means of contributing to the higher well-being of the people. Successful Chautauquas have been held in St. John, Halifax, Ottawa, Montreal and Toronto, but even these centres cannot boast of the success attained by Winnipeg, Calgary, Edmonton, Moose Jaw, etc. In fact, so great have city Chautauqua audiences become that Canadian Chautauquas will have to provide more tents and approximately three times as large as formerly used, in order to accommodate the increasing numbers that are eager to enjoy Chautauqua programs. Something like three thousand people attended the evening sessions of Chautauqua in the city of Winnipeg last year. This naturally means that smaller communities have received the benefit of better Chautauqua programs because of the co-operation of these larger centres.

The holiday season is upon us again and it would appear greater numbers of people than ever are taking advantage of it. An auto trip lasting from one to three weeks seems to be a part of every auto owner's holiday itinerary. Camping is a part of the vacation which is very popular both because of its economy and healthfulness. These summer trips are very far from wasted, in fact it is a matter of regret that everyone cannot take a vacation regularly. The neatest kind of work grows monotonous by being kept at it year in and year out without a change.

The trek to the Calgary exhibition this year is undoubtedly the largest from this district that has ever occurred. Those who are leaving on their holidays are saving a day or two for the exhibition.

The G. C. C. W. report of July 9th says: "Conditions in Alberta have been almost ideal. Rainy hot weather has caused remarkable growth and it is conceded this is one of the best crops on record from weather standpoint. All wheat is showing signs of heading within next few days. Oats and barley are making correspondingly good growth. Winter wheat is in head and despite the fact that some of it was touched by frost, will make a good crop. Barley has affected the same result. Crop but good weather should put things right. Livestock is doing well."

OTTAWA, July 10.—Canada's total area estimated as sown to wheat for 1928, is 23,405,900 acres against 22,469,154 acres finally reported for 1927. The Dominion Bureau reports an increase of 946,746 acres for 1928.

The area of fall wheat to be harvested, according to a crop report issued today by the Dominion Bureau of Statistics, is estimated at 795,500 acres against 853,238 acres in 1927, a decrease of 57,738 acres or seven per cent. Spring wheat occupies 22,610,400 acres against 21,606,892 acres, an increase of 1,003,504 acres, or five per cent.

HORSESHOE PITCHING TOURNAMENT

A Horseshoe Pitching Tournament will be one of the features of the big F. A. Sports Day to be held in Travers on Wednesday, July 25, 1928. The competition will be open for teams of two men each and will be held under the regulations of the National Horseshoe Pitchers' Association. The entry fee will be 50 cents each person or \$1.00 a team. All entries will close by 3 o'clock p.m. on July 25th. The match will begin at two stages.

(A) First Stage—Beginning at 10 o'clock a.m. and closing at 3 p.m. Each team will pitch 100 shoes or 50 shoes per man. The total score of each man and each team will be kept. A special prize of \$5.00 will be awarded to the man who scores the greatest number of ringers in the first stage.

(B) Second Stage or Finals—Will begin at 4 o'clock p.m. July 25th. The eight (8) teams making the highest scores in the first stage will be selected and the rotation or round robin plan will be followed by which each team will pitch one 21 point game against each other team.

To the team winning the most games in the finals—First prize, \$10; second prize, \$5; third prize, \$2.50.

An official scorer shall cover each game and a referee shall decide points when contestants are in doubt. It is hoped every district will send its champion teams.

Other attractions for the F. A. Sports Day will be: A big baseball tournament wherein Turin, Queenston, Travers and other crack teams will batte for championship honors. Boys' and girls' races. Horse racing. Tug-of-war, etc., etc.

The secretary of the Travers Horseshoe Club will be glad to forward any further information. Come and bring your family and friends — we will make you welcome.

Medus J. Bolduc, president; James Salows, secretary.

Local and General

Mr. and Mrs. Earl Dittu and family left for Spokane on Monday, also Mr. and Mrs. A. Bach and Mr. and Mrs. W. Summers.

Mrs. Henry Boohar, her son Fred, aged 24, and two hired men were murdered at Manville by a supposed maniac.

Mr. and Mrs. G. M. Campbell left on Sunday on a holiday trip which will extend to California. H. E. Johnson and Miss Leola will accompany them on the trip.

G. F. Smith's new office building is nearing completion and will make a very considerable improvement to appearance of the street on which it is located.

The improvements in W. C. Hosking's hardware store are nearing completion and will add greatly to the space available for display of his stock and also provides better lighting facilities.

The painting of the Savoy Hotel, which has been delayed by the unusually wet weather, will begin as soon as the weather is sufficiently settled to permit the work being carried on.

Orville Harper's report on the Peace River district after his recent visit is quite flattering to the prospects there but he considers the price of improved land there to be very high considering its possibilities of production. The cutting districts did not appeal very largely to him.

An appeal is being made to the ratepayers of the Consolidated school district to pay arrears of taxes due to the district. These have reached a large sum and the Public Utility Commissioners insisted that these arrears should form a part of the money used in the construction of the new school. There is every reason to assume that a general effort will be made to reduce these arrears to a minimum amount.

Leave Your Order Now for

Raspberries & Cherries

The quality of those arriving and their condition is excellent.

Apricots

**Will arrive around the 10th
of July.**

We are advised that the rain has in no way affected this crop, but if you need Cherries you will have to place your order early, for the rains have damaged 50 per cent of the crop.

NOTES AND COMMENT.

It is not only wheat that has made a magnificent growth this year. Weeds of every description are flourishing as never before with the result that many fields of wheat, especially that sown on stubble will suffer from their depredations. The writer has destroyed the weeds on a patch of ground three times this year and they are again in bloom. The situation provides a real problem for everybody concerned. Some greater precautions in respect to weeds are absolutely essential if this is to remain an agricultural district.

Are we in Canada profiting by the experience of other countries? Fortunately, we are to a certain extent; the protection idea is rapidly spreading here.

The appropriations for protection are increasing yearly. Permanent systems with towers, telephone communication and in places aeroplanes are steadily gaining ground. In Ontario, Honorable William Finlayson states that the people must be prepared to spend still more money on their protection if the revenue from the forest is to be maintained. He further states that the forest must be looked upon as a crop and treated as such here is the crux of the whole matter.

Once the people of Canada are convinced of this, the necessary expenditures for adequate protection will forthcoming as a matter of course. Unlike the forests of the United States, which belong largely to private owners, the forests of Canada belong to the people. The United States are spending millions of dollars annually to get back some of their forest and as far as possible for the protection of Canada she does not need to do this, but she does need a still more effective fire protection organization if she is to win out in the battle against fire during the years of real hazard.

Six thousand men are now protecting your forests are coming on your active protection this year. Report all fires immediately to the nearest forest fire-ranger or forestry branch headquarters.—Forests and Outdoors.

POSTMASTERS' SALARIES

Chances that postmasters continue to be inadequately compensated, as was claimed by their Alberta association in convention in Calgary last week, constitute a very serious grievance, should they prove to be well founded, to the rectification of which the Canadian public will readily agree.

The work of the postmaster and his assistants is an unusually exacting task, the only governmental undertaking which requires a man, woman and child in Canada. Their work is of a particularly exacting nature and the unfailing accuracy with which it is executed is demonstrated by the implicit confidence with which the Canadian citizen entrusts his mail to the postmaster's care.

Suggestions heard at last session of the Dominion Parliament looking toward the fixing of postmasters' salaries, it would appear by the discussions of last week's convention, have been partially implemented but at the expense of the larger post offices, only those postmasters who were then receiving less than \$100 a year reaping the benefit, while the larger post offices actually received less money.

There are a number of directions in which Canadian taxpayers would profit far in government retrenchment applied rather than toward postal service. Not only is the postmaster one of the country's most reliable servants, but he may safely be credited with being one of the most willing in proportion to his rewards.—Alberta.

Because It Is Farmer Owned

Because it is farmer owned, farmers expect, and they have a right to expect, the highest possible standard of service and treatment at elevators of this farmers' company.

And many farmers tell us that they do get such service and treatment at U.G.G. Elevators.

MANITOBA PROFESSOR SUCCEEDS DR. TORY AS HEAD OF UNIVERSITY OF ALBERTA

Edmonton, July 9.—Dr. W. C. Wallace, whose appointment to the University of Alberta succeeded Dr. H. M. Tory, was inaugurated yesterday as the new professor of education. Hon. J. E. Baker, in the absence of Premier Browne who left on Saturday night, presided over the ceremony.

Dr. Wallace expects to be able to take up his duties by September 1.

Exceptional Education
Winnipeg, July 9.—Dr. W. C. Wallace, whose appointment to the University of Alberta was officially announced yesterday, is at present head of the department of mineralogy and geology of Manitoba University and professor of mining for the province. He was formerly connected with Northern Manitoba.

Wallace is of exceptional education. Dr. Wallace came to Canada in 1910 from Scotland. In that year he became lecturer in geology and mineralogy at Edinburgh school. Edinburgh University was the holder of his first three degrees in 1901, 1907 and 1912, and Goettingen University of his fourth degree in 1916.

In 1916 he was appointed commissioner for Northern Manitoba and his studies ended with a bachelors degree in 1921 when he was appointed a member of the board of trustees of the provincial library and art gallery.

Dr. Wallace was elected vice-president of the Canadian Institute of Mining and Metallurgy and a fellow of the mineralogical society of America. He is also a fellow of the Royal Society of Canada and of the Geological Society, London. He is the author of his own researches, exploring and field work. Dr. Wallace has found time to write copiously on the subjects in which he has earned distinction.

FRANK LEONG, Prop'r.

Cleveland, building fund, \$200,000. Son Gives Too

TARRYTOWN, N. Y., July 9.—John D. Rockefeller junior has purchased for \$50,000,000 the Pocantico Hills property of Josephine, the College widow of George F. Vanderbilt, and has given the college \$1,000,000 toward the cost of its removal program.

The \$1,000,000 gift to the college

was said to be largest single gift Mr. Rockefeller ever had made to Catholicism.

ROCKEFELLER 80 YEARS OLD—
RECELEBRATED BIRTHDAY
SUNDAY

New York, July 9.—Dr. John D. Rockefeller, who is 80 years old yesterday, has not made major gifts to as many institutions as his son, but his contributions are larger by far. A compilation of the large gifts of the Rockefellers from 1910 to 1927 shows that the total value of the gifts to institutions and the poor is \$60,004,480 to 42 recipients. These figures do not include gifts to the University of Michigan, which was unreported and amounted approximately to \$45,000,000.

Only three of the elder Rockefellers gave less than \$1,000,000, whereas 22 gave more than that amount. No gift of less than \$100,000 is included in the compilation.

The contributions of the senior Rockefellers in the period mentioned follow:

Rockefeller foundation, \$182,704,629.

General education board, \$129,17,960.

Lawrence Spelman Rockefeller memorial, \$73,715,471.

Rockefeller Institute for Medical Research, \$39,604,602.

American Baptist Foreign Mission society, \$25,500.

Ministers' and missionaries' benefit fund of the Northern Baptist convention, \$3,760,000.

American Baptist Home Mission society, \$4,475,000.

Y. M. C. A. international committee, \$2,000.

Inter-church world movement, \$500,000.

Euler Avenue Baptist church,

PREMIER INDEFINITE ON ROAD SITUATION

Calgary, July 6.—Premier J. E. Brownlee, when questioned here Friday morning as to what the government planned to do to remedy the present terrible condition of the main highways of Alberta, was indefinite and very non-committal. The government, he said, money, he said, was being pushed as fast as its government's ability to pay would allow. As to actually what was being done, he did not say, but he cannot be held responsible, he commented, "for a condition that is caused by unusual weather conditions. In addition, he said, there are many roads that are many farmers who cannot get to town. The market roads of the province are just as important as the highway roads."

Some of the towns throughout Alberta, he said, had accepted the government's proposition to contribute half the expense of making and keeping up passable highways through the mud. He mentioned that one town, except two others in Calgary and Edmonton, had agreed to this, but the others had done nothing as yet. It had nothing to say when questioned as to whether or not the government would take action to compel non-complying towns to accept the proposal and whether it was the intention to build highways around them, which would be expedient. Mr. Brownlee stated that in his opinion and according to reports he has received from all parts of the province the crop outlook was excellent at the present time.

FARMERS MAY HOMESTEAD SECOND TIME UNDER NEW DEPARTMENTAL REGULATION

A new regulation of the department of lands and forests, it is possible for Canadian farmers who have homesteaded to exercise their homestead rights a second time. While this new regulation will not affect the lands in the south it is needless will be utilized by settlers going into the open lands in the north.

The new regulations, says the Edmonton Journal, will give a great impetus to the land rush at the office. The same applies in the Peace River country where great numbers of all kinds of settlers are preparing to file on homesteads for the second time.

By the recent amendments to the dominion lands act, all who filed, did their homestead duties and were eligible to take out their patents to the lands prior to Jan. 1, 1925, may again seek land. Before filing at the local land office however, it will be necessary to make application to the committee of the dominion lands, Ottawa, giving particulars of the land proved up, when they will receive certificate of eligibility to file for the second time.

EARLY WHEAT IS WELL HEADED IN MANY SECTIONS REPORT STATES

Edmonton, July 7.—Early sown wheat is well headed in many sections of the province, and all grains are showing splendid growth, according to telegraphic reports received by the department of agriculture on Friday for the first fortnight of June out of the seven. Growing conditions have been ideal since the last report was issued, the entire province having benefited from good rains during the past two weeks. Crops which appeared somewhat patchy owing to the delayed germination are now being brought along. Most are showing a much greater uniformity and little difficulty is expected at harvest time as a result of this situation.

Cook grain have all been making vigorous growth and a great many fields of oats and barley are in the shothole. All crops we studied were more healthy than was expected during the dry period, with a consequent improvement in the prospect for a heavy yield. A number of reports say that summer-fallowing is being temporarily delayed by the unusual amount of moisture in the soil. Conditions have been good for breakers and in many localities more new land is being brought under cultivation this season than for many years.

Hail has interfered to some extent with haying in the southern part of the province, where a very satisfactory crop of alfalfa and sweet clover is being raised. Much work is being made with the thinning of the sugar beet crop and a good yield is promised from the 5000 acres sown to beets this year.

Crops in the Peace River section of the province are somewhat more advanced than at this time last year and are in for a very satisfactory yield are reported.

Crop damage has been confined to the eastern and southern districts and areas affected are negligible. Practically no injury from insect pests is reported. Pastures have made renewed growth as a result of the rains and livestock is in very satisfactory condition.

Joe Bennett returned to town on Tuesday after a trip to the Peace River country. Joe likes the country but is of the opinion that business of every kind is poor. The rush to the district is wonderful, but the percentage of those remaining there is not very large.

CHAPTER XXVII.—Continued.
Dr. St. John would not have been critical of his wife if she had chosen to follow some profession. He would have liked that. He did not believe that she could do it, however, and from the domestic model, making the coffee and ironing shirts—anyone could do that! But the companionship—the good fellowship of a wife—how he craved it! Now that craving was strong. She had a quiet sense of chattering, a hoarder of trinkets, a bridge player, a tea drinker!

The telephone rang.

"Yes, it's Dr. St. John, Who is speaking?"

"Jack—Jack Doran."

"Eva's brother?" On your way through? Come along, yes we are at home—I'll drive down for you—only thirty minutes. Grand'pa? I'll be there—yes, Eva will come too."

The Doctor hurried into the living-room and spoke to Eva. "Jack is at the station. Get on your things," he said. "My car is at the door. Leave the children with me."

"We will go all right," cried one girl, with very gallant shoulders; "I want to see Eva's good-looking brother. Let's give him a regular send-off."

The crowd was something, particularly irritating to the doctor in their idleness, their gaiety, their lack of seriousness. "Stay here," he said curtly; "Jack Doran has no desire to be met by a crowd of strangers, and he is not in the mood for meeting them."

Eva turned on him indignantly. "Well, I like that," she said. "Remember, a station is a public place—anyone can go. Come on, kids, every one of you."

The Doctor took his wife's arm with a suddenness that surprised her and said, "Hurry Eva—have you no sense?"

"You have no right to be rude to my friends," said Eva, peevishly, when they were on their way to the station: "They acted abominably just now!"

"Oh forget it!" The Doctor said, "and try to get a serious thought in

your mind for once. Your only brother is going to war, and the chances are that you will never see him again. Have you nothing to say to him? Forget that calcining gang for half an hour. Their feelings are not hurt."

Eva looked at him in speechless amazement.

Jack had hoped that he might see his sister and the doctor alone. He wanted to tell his sister about Helen. The boy's heart craved companionship—he must tell someone. But the whole crowd swarmed around him with questions, and he had no time for senseless chatter, and so a few minutes went by uselessly. The Doctor was furious, and it was against Eva that his rage was directed. Here was his only brother going away, and she had had a serious thought in her head, not one loving, personal word for him.

The Doctor took Jack's hand at the last as they stood at the steps of the station. "I'll go with you to the train long night, and we will all be needed. I cannot stand back and see other men go. I am proud of you, Jack. Can I do anything for you?"

"I want to tell the Doctor to call Jack—but the conductor was calling and the train bell was ringing."

"I wish I could have had a good talk with you," said Jack, as the train began to move.

That night when his company had gone, Eva came into the Doctor's room. His light was still burning and she knew he was not asleep. Eva sinus and graceful, in a light gown, she was smiling and happy. Her check was not the first sign of indisposition in her tanned face. Her married friends assured her that if a man is "let away" with an exhibition of temper, especially when he is not used to such treatment, it is a sign that he mind made up to be very haughty and coldly proud. She would forgive him, but only after a distinct understanding.

"What have you to say?" she asked him, with the quenched name that had never failed.

"Nothing," he answered, "only that it is time you were in bed."

"Do you mean to say, that after putting my brother in bed, you are going to sleep?"

The doctor laid down his book. "If great gods had any sense, which they have not, they would have stayed here and let you and me go alone. They don't know Jack and I are here, and we are not here to stay. We are here to help our country, and the nation because it was something to do something to relieve the dullness of their vacant minds. I told you to hurry if you wanted to see your brother. Now you can be as sure as you like that he is safe."

All the spring birds that had

come back to gladden the land the crows were most in evidence for the reason because it was something to do something to relieve the dullness of their vacant minds. I told you to hurry if you wanted to see your brother. Now you can be as sure as you like that he is safe."

For the first time in his life he had expected, returning home

UNIVERSITY OF MANITOBA WINNIPEG

Others, among others, the following Courses:

THROUGH THE FACULTY OF ARTS degrees of B.A., M.A. and B.Sc., THROUGH THE FACULTY OF ENGINEERING AND APPLIED SCIENCE degrees in B.Sc. (Eng.), B.Sc. (Tech.), B.Sc. (Aero. Eng.).

THROUGH THE FACULTY OF MEDICINE degrees leading to the degrees of M.D. and M.S.

THROUGH THE FACULTY OF LAW degrees leading to the degrees of LL.B. and LL.M. Through the MANITOBA LAW SCHOOL, affiliated with the University, degrees are given to the degree of LL.B.

For further details concerning courses and other information apply to W. J. SPENCE Registrar, University of Manitoba, Winnipeg.

afraid of that. Old women are patient, kindly, motherly people, ready to help, ready to warn, anxious—perpetually desiring them. You were quite ashamed of my dear old mother when she came to visit us; she was so old-fashioned and quaint to you and your friends. No, you will never meet an old woman, Eva; in another fifteen years you will be a stale novelty."

She turned and left him without a word. Reaching her room, she hung herself across the bed and wept for sheer despair.

The next day the doctor told his wife that he had enlisted for service overseas. Eva hoped and expected right to the last minute that he would apologize and beg off for another year. She was disappointed, and the harshest part of it was that he did not seem to care.

CHAPTER XXVIII.

The people of Bannerman have not forgotten April 29th, 1915. That day George Bannerman, a young man about twenty, had come early to North America to fight for his country. He was advancing with feverish haste. The red tasseled of the papaya were paling into featheray green, and already some were to be found littering the woodland paths. Their work was done, they could take their rest.

Can Anybody Enjoy Illness?

Succession Of Lazy Days Would Bore Most People

Mrs. Baldwin says that when her husband died, she is going to settle in Canada. Why? To return to the scene of their operations and spend a lifetime of inaction, when, in reality, could that dream come true? It would bore them to tears? That's what the experts say.

Eva was looking at him now through her school-lids. Dull anger burned in her eyes.

"You are no longer a child, Eva, though I can hardly say you are a woman. You are a perfect form to hang clothes on, a very nice addition to a very friendly family.

"But you could get away with it right now if you would give a violent exhibition of anger. But something tells you it would be quite useless. You will never be an old woman, Eva; don't be

afraid of that. Old women are patient, kindly, motherly people, ready to help, ready to warn, anxious—perpetually desiring them. You were quite ashamed of my dear old mother when she came to visit us; she was so old-fashioned and quaint to you and your friends. Teeth and Health

**taught By The Canadian Dental Association
Edited By The Saskatchewan Dental Society**

HOW TOOTHACHE STOPS

In toothache we find a fight progressing between the invading organisms and nature's little warriors, the pain.

Then what decides the tide of battle?

Should the invaders not have made too great headway through the breach in the pulp wall, the chances are that the tooth will get well.

especially if the tooth cavity were

filled with a paste of mercury,

but the tooth dies the pain comes.

But should this aid not forth-

coming, the invading organisms

increase in numbers, and discharge their poisons,

while the little warriors are

working harder than ever.

For the invading hosts, instead

of the ordinary railroad

or automobile, they will be safe

traveling as the ordinary railroad

or automobile.

They cannot be made to stop,

but the pulp does.

When the pulp is annihilated,

the tooth dies the pain goes.

Is it the danger past?

For the invading hosts, instead

of the ordinary railroad

or automobile, they will be safe

WORLD HAPPENINGS
BRIEFLY TOLD

Royal Canadian Mounted Police in all parts of Saskatchewan are carrying on a vigorous campaign to remove firearms from the possession of aliens.

International peace congress at Warsaw ended its session by strongly emphasizing the conference's appreciation of the Kellogg proposal to outlaw war.

Mining staking in Manitoba for the first time last year reached a record-breaking figure, according to the monthly statement of the Federal Recording Department.

His Majesty King George, is giving up Abergelio Castle, which he and his two predecessors, King Edward and Queen Victoria, had on lease for about eight years.

A. H. Gee, Ph.D., prominent young Canadian scientist of Toronto and Yale universities, has been appointed assistant professor in the University of Quebec. Dr. Gee is only in his middle twenties.

Negotiations for amalgamation of the Marconi and Eastern Telegraph Companies are reported to be coming to a head and an announcement is expected shortly. Details of the negotiations include the government-owned Imperial Radio it is said.

Dr. Duncan Campbell Scott, deputy superintendent general of Indian affairs, has been appointed by order-in-council to be one of the six commissioners to be appointed to administer the lands in place of John W. Greenway, Commissioner of Dominion lands, who died some time ago.

A bylaw passed by the Montreal City Council, in 1878, prohibiting unlicensed persons from keeping a concert. A fine of £100 and music dealers was fined £100 and costs for creating unnecessary noises by means of an outside gramophone apparatus.

Market for Alberta Wool

Satisfactory

Japan may become one of Alberta's important wool markets. The agricultural Department, at Edmonton, has been advised by K. Miyashita, Kobe, Japan, that samples of Alberta wool sent to Japan on request some time ago have been inspected and tested and the results are highly satisfactory.

Mr. Miyashita says that the Japanese are particularly import wool of the same quality that this province and that it is likely a number of orders will be given for this year by private firms. Further information is being sought as to what market and tonnage can be supplied.

The possible establishment of trade connections with the Japanese market in wool follows a series of inquiries covering the past year or more.

K. Kanda, director of experimental farms for the Manchurian railway, looked somewhat carefully, on his recent visit here, into the possibility of doing some business in this line, and Capt. S. Kawamoto, who spent a month in Canada last year, is also greatly interested in the question of wool, among other western products for trans-Pacific import.

Hungarian Organize

The Hungarian Association of Saskatchewan was organized with a view to assisting the 40,000 Hungarians now living in this province. Tritz Leiseltaker, of Regina, was elected president. Headquarters of the organization will be in Regina.

Courts—"Oh, if he'd only go home!"

Marriage—"Oh, if he'd only come home!"

A red sunrise with clouds lowering later in the morning indicates rain.

"Have you a book called 'How to Fight the Increasing Cost of Living'?"
"Yes, but it has gone up in price."
—Pele Mele, Paris.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

Before leaving for Denmark it was our privilege to lay a wreath at the Cenotaph in Whitehall, a wreath of poppies in tribute to the Empire's fallen heroes. We marched past the Cenotaph, Avenue of the Cenotaph, escorted by mounted and foot police. This was the last day of the tour. Every Province and city carried by Mr. William Gilt, of Kenway, Manitoba, and Mr. P. R. Augustin, of Edmonton, both of whom had sons in the war. Reverently they laid a wreath of poppies at the Cenotaph, silent, stern, hush-hush and in silence. This was our most precious duty, one which we took the most seriously, whatever else this tour may be forgotten, can never fade.

We had time before returning for Hartington, to call on the House of Parliament and Westminster Abbey.

One of the most striking features of the Palace of Westminster is the Victoria Tower.

The Victoria Tower above the royal entrance is said to be the tallest tower in Europe.

The site of the House of Commons was occupied by an ancient palace known as the Tower of London.

Henry VII, the chief London

monarch of the reigning sovereigns,

had the tower built between 1485 and 1505 and cost \$15,000,000. They cover eight acres and rise 110 rooms and two miles of passages.

We passed through both the

houses of Lords and Commons,

the former being the home of the state chair of the Prince of Wales. In the Commons we were shown the places occupied by Mr. Baldwin, Mr. Churchill, Mr. Ramsey Macdonald, Mr. Lloyd George, and other front benchers of the three parties.

Westminster Hall, dating from

the time of Edward I, must

not be missed. It is in the form of a

cross, 512 feet in length and 209 feet

wide, arched galleries, and the

Seven Bishops. We saw the brass

plaques marking the spot where the

heads of the seven bishops were

beheaded in the Tower of London.

There were the bodies of Edward VII,

and William Edward Gladstone lie in

state in the crypt.

There is no nobler building, nor one

that visitors from Overseas could de-

serve more than to visit the Abbey.

It is built in the form of a

cross, 512 feet in length and 209 feet

wide, arched galleries, and the

Seven Bishops. We saw the brass

plaques marking the spot where the

heads of the seven bishops were

beheaded in the Tower of London.

The coffee rests in soil brought by

ship from Copenhagen.

The beauty of the Abbey, no less

than its historical associations, filled us with admiration.

Henry VII, forming the eastern

end, is the largest in the land

and the Tudor Gothic style

is superb. The roof is tracery

of marble, beauty is its crowning

glory. The Chapel of the Pyx

is the Chapel of the Pyx with the

treasure used to be kept, and on

the door human skin still adhering

to the wood, which was the punishment

was not so light as now.

In the Chapel of Edward the Confessor, the Coronation Stone and Stone of Scone, said to have been

the Coronation Stone of Scottish

English King since Harold was

crowned in Westminster Abbey.

Even then did not reflect the

business aspect of our tour, for the

afternoon was ended by an inspection

of the Milk Distributing Dep't.

Copenhagen.

PRINCESS ELIZABETH

Britain's most popular little lady. Princess Elizabeth, daughter of their Royal Highnesses the Duke and Duchess of York.

strung with joy, and today are glad to shake hands with an able and first class companion. And we Canadians are equally happy.

Other interesting features of the trip were the history of the place we visited, which were answered

by the leading agricultural professor in Denmark and the volume of trade made in Denmark by Mr. C. Christensen, the only Danish born Canadian.

In the afternoon had the pleasure

of viewing Amalienborg Palace, the residence of the Danish Royal Family, Christiansborg Castle, and other interesting buildings which the city of Copenhagen has to offer.

Western Farmers Are Skilled Operators

Modern Machinery Has Reduced Labor to a Minimum

From a review of agricultural conditions in Western Canada, published by Agricultural and Industrial Progress in Canada, it appears that the modern farmer has developed into a unique figure, far removed from the older conception of the agriculturist. That idea pictures him as a man mighty of brawn and sinew, with a strong desire to work hard.

Today the modern farmer is a man of middle age, of solid physique, and of mental alertness. He is a man who has reduced labor to a minimum, indeed almost eliminated. The farmer of today is a skilled operator.

Even though the amount of work required to maintain the farm is constant, the amount of time required to do the work is less.

Little do we think as we gaze at the modern farm equipment that the days of the medieval peasant are gone. Even though the amount of work required to maintain the farm is constant, the amount of time required to do the work is less.

Less time is required to do the work, and the amount of time required to do the work is less.

Even though the amount of work required to maintain the farm is constant, the amount of time required to do the work is less.

Even though the amount of work required to maintain the farm is constant, the amount of time required to do the work is less.

Even though the amount of work required to maintain the farm is constant, the amount of time required to do the work is less.

ITALIAN AIRMEN ESTABLISH NEW DISTANCE RECORD

Rio Janeiro, Brazil.—A new distance record for sustained flight was completed when Captain Arturo Ricci and Major Mario Del prete, Italian airmen, landed on a little beach ten miles north of Natal, Brazil, some 4,600 miles from their take-off at Montecarlo Field, Italy.

They brought their big seaplane, which had previously established a world record for duration flight, to the land after a flight which took them across the Mediterranean, through the Strait of Gibraltar and then southwest over the Atlantic to the Cape Verde Is-

lands. An hour and twenty minutes after landing the fliers resumed their flight heading for this city, but were later forced to descend again at Montecarlo.

Stormy weather with heavy clouds put the fliers in peril in the last hours of their effort and radio reports have indicated that they had difficulty in maintaining their bearings after they reached the coast of Brazil.

They were sighted over Port Natal at 4:05 p.m. and were then believed to be heading for Fernando Po. But three hours later, 7:30 minutes after they came down ten miles north of Natal at Point Genipabu. Poor visibility is believed to have caused their indecision.

The failure of the two intrepid Italian fliers to make it up the coast of Rio Janeiro brought disappointment to a huge crowd of spectators in this city. Word that the fliers had gone beyond Natal, flying to the south, came with absence of any report of their arrival near Fernanpho spread rapidly through the capital and brought throngs to the water front.

Widow of Captain Hinsheliffe Says They Are Unpaid For London, England.—The Daily Mail published a complaint from the widow of Captain Walter G. R. Hinsheliffe, pilot for the Hon. Miss Mackay, her ill-fated trans-Atlantic flight, saying that the aviators were unprovided for. The establishment of a trust fund to reduce the British national debt in memory of Miss Mackay, by her parents, Lord and Lady Inchape, called forth the letter.

Mrs Hinsheliffe argued that while there was no legal obligation on Lord Inchape, there was a moral one, because the whole school of the British aristocracy, and Miss Mackay, had written four times to Lord Inchape telling him of her position and need. He replied non-committally, to the first letter, but she received no response to the others.

The government has already accepted the trust fund of \$2,500,000, which will be left to accumulate for 60 years and then applied to the debt.

Interested In Wireless Merger

Beatty Makes Important Submissions to British Government is Replied

London, England.—The Daily Mail says that President E. W. Beatty of the Canadian Pacific Railway, has made important submissions to the British Government embodying Canadian views concerning the planned merger of the Canadian and cable companies to operate imperial communications. Until these recommendations are sifted out, delay in publishing the terms of the settlement is to be avoided, says the newspaper. No confirmation of these statements is obtainable, but Canadian Press understands that any modification of terms now under consideration that might be made would likely be of small importance.

Problem For Ontario

Toronto.—The spread of communistic literature throughout the school sections of Northern Ontario recently has led to accusations to officials of the department of education at Queen's Park. Departmental officials are making fresh inquiries regarding the activity of the communists involved in preparation for any action the prime minister may take to put on his return from Europe.

Goes Over Niagara Falls

Jean Lussier Successfully Performs Daring Stunt

Niagara Falls, N.Y.—For the third time in a year Jean Lussier, 36-year-old French-Canadian now living at Springfield, Mass., went over the Horseshoe Falls on the American side in a specially constructed rubber boat while a crowd of 150,000 people lining the river bank on both sides cheered and applauded him.

The start was made from Cayuga Lake, about three miles above the falls, where a 200-foot steel bridge was rescued from the bridge eddy below the falls at 3:30 o'clock by William Hill, daring riverman, alone in a boat.

At first it was feared the giant boat might be carried down stream into the rapids. Lussier plunged over the brink at three

Wheel. When Hill reached the boat it was turned up on its side a matter of only a few seconds and it was towed to shore and opened.

The first to greet Lussier with a resounding smack on his cheek was his sister, Madeline J. F. Cautiere, of Paris.

The only bruises Lussier suffered in his perilous journey were of minor nature. There was a small mark on his right temple, another on his left shoulder, and a small cut on his left shoulder blade, all received, he said, in the terrific bouncing while his strange conveyance was passing through the rapids above the falls.

Asked concerning his sensations while going over the precipice, Lussier said:

"I didn't even think. It happened too fast."

An Interesting Exhibit

Improved Methods of Marketing to be Demonstrated at Western Fairs

Winnipeg.—An interesting exhibit bringing directly before the producers some of the lessons learned during the Canadian National Railways marketing tour of the British Isles, the Department of Agriculture is preparing an exhibit to be shown at the fairs at Brandon, Calgary, Edmonton, Saskatoon and Regina during July.

The exhibit will be conducted in a causewayed hall, and the Canadian Railways are providing lecturers and demonstrators will be in attendance throughout. The exhibit will be for Bradys for the period of July 17-21; Franklin, July 17-23; Regina, July 17-21; Saskatoon, July 17-23 and Regina, July 30-August 4.

Among the matters which the exhibit will stress will be the importance of standardization in making quality products in the British Isles and all the standardizing of grades and improving methods of marketing Canadian agricultural products so that they can meet more efficiently the international market. The Canadian agricultural research stations are now conducting such work, but will make possible research on many pressing problems for which money hitherto has not been available.

The purpose of the exhibition is to demonstrate to the lecturers and demonstrators provided by the Government, there will be in attendance at the exhibit at each point visited two or more of the farmers from that district who made the trip last year.

Regrets Appointment Of Viscount Byng

Has Been a Mistake Says London Daily Express

London, England.—In a leading article The Daily Express has greatly regretted the appointment of Viscount Byng, former Governor-General of Canada, as Commissioner of the Metropolitan Police to succeed Sir William Horwood, who is retiring.

"Nobody questions his splendid war record," The Express says, "but one man can lead only one life."

"We feel very strongly there has been a mistake on both sides and only Viscount Byng's voluntary resignation will satisfy us all," the article continues. "That magnificent force, the Metropolitan police, should have at its head a young man of enthusiasm, initiative and vision combined with driving force."

The impression is growing here that Viscount Byng will withdraw his acceptance of the commissionership of the Metropolitan Police if the present crisis is allowed to continue.

The objections to his assumption of the post are that he is too advanced in years for an arduous position in which he had no previous experience, and that the group of men he has chosen, particularly the Labor members, and a number of the newspapers are criticizing his appointment.

Problems For Ontario

Toronto.—The spread of communistic literature throughout the school sections of Northern Ontario recently has led to accusations to officials of the department of education at Queen's Park. Departmental officials are making fresh inquiries regarding the activity of the communists involved in preparation for any action the prime minister may take to put on his return from Europe.

Fraudulent Currency

Fake American Bills Being Circulated in Winnipeg

Winnipeg.—United States wires a few days ago carried warnings of the frequency of fraudulent \$20 bills. Some of them have turned up here. Several merchants have been victimized in the last few days by the fake notes.

Bills used here are valid one dollar bills cleverly changed to give the appearance of the note of larger denomination.

Police fear an influx of the fraudulent notes during the next week when the Norse convention will draw hundreds of United States visitors. Merchants have been warned.

Serious Drought in Mexico

Some Sections Have Had No Rain For a Year

Mexico City—Cattle are dying, crops are failing and streams are running dry as heavy losses and some of them rain, in many parts of Mexico as the result of one of the worst droughts the country has ever had.

Conditions are worse in the central plateau, the granary of Mexico, where the corn crop is almost ruined, and in the cattle and grazing areas to the north between Mexico City and the border. Some of this territory has had no rain for half of ten-year period.

Food Shortage in Russia

Soviets Buying Huge Amount of Grain in Baltic

London, England.—Huge purchases of grain from the Baltic exchanges by Soviet Russia are reported in London. Traders have expressed the opinion that the movement indicates a severe scarcity of food in Russia.

The quantity in Liverpool for spot contracts amounts to between 150,000 to 200,000 tons of Baltic grain. London brokers expect Russia to buy almost as large a quantity again.

The prices agreed to without negotiations thus far have been uniformly as follows: 100 cents per quarter to secure the market rate, which is felt to indicate a tremendous immediate demand for grain.

London brokers say they have reports of long bread queues and a painful shortage of food in Russia where the nation, was one of the world's largest exporters of grain.

Russia has not bought such supplies of wheat since the winter of 1919-1920.

THE CHRONICLE, CHAMPION, ALBERTA

CHAMPION CHATTER

VOL. I
Thursday, July 12, 1928.

PUBLISHED IN THE INTERESTS OF THE PEOPLE OF CHAMPION AND FARMERS OF THE VICINITY.
GEO. L. DEUPE, Editor.

EDITORIAL

On nature and perspective reflection, we will throw in most heartily and enthusiastically, with a smile, the maxim, "Darn an editorial column in July, anyway."

Our swather is all set up and is meeting with the approval of all those who are inspecting it.

The Good Old Days
Albertus has come to stay! He will have his wife's cost him Just one home.

Harold Tindal has taken out a 12 ft. McDriv rod weeder.

Adam Ferguson says: "What has become of the man who used to wear a cabbage leaf in his hat to keep cool?"

Champion seems to be well represented at the Calgary Stampede.

"Good Equipment Makes a Good Farmer Better"

W.I. Holds Regular Meeting

In spite of the combination of Stampeds week and vacation time, fourteen ladies were in attendance at the regular meeting of the Champion Women's Institute, held in the home of Mrs. L. Barker on Tuesday afternoon.

The main features of the program were an interesting paper on "Cannibalization and Immigration," by Mrs. J. T. Stephenson, and a very complete report of the recent Provincial Convention held in Calgary, by Mrs. K. E. Steeves, (read by Mrs. Beaubien).

Many important items of business came up for consideration including a final report from the Bake Sale convened by Mrs. Stephenson; report from the refreshment committee for "Visitors' Day" convened by Mrs. Hdmuel, and the report from the Social Afternoon when the Advisory Board were hostesses, Mrs. Beaubien, convener. Mrs. Mifflin proudly presented the W.I. with \$10.00, the amount of the prize awarded the W.I. float on Dominion Day.

Each of these committees was tendered a vote of appreciation for their efforts in making their respective undertakings so successful.

A further contribution of \$15 was voted to the Junior Tennis Club, making a total of \$25.00 supplied by the W.I. towards properly fitting up the tennis courts.

Mrs. Basin, Mrs. Alcock and Mrs. Mifflin were appointed to draft a constitution for the local branch, and Mrs. Alcock was named the local representative for the "Links of the Empire."

The invitation from the Board of Directors of the Carmangay Agricultural Society to enter the contest for exhibits of soil products elicited an enthusiastic discussion and was accepted by a unanimous vote. The following committee was named to make all necessary arrangements for the Champion W.I. display: Messrs. B. N. Woodhull, G.F. Smith and J.N. Beaubien; Mrs. U.S. Alexander and Mrs. M. Sison.

Tea, sandwiches and cake were served by the hostesses for the afternoon, at the close of the business session, Mrs. B. Hummel, Mrs. M. Sison and Mrs. Williamson.

WINNIPEG, July 9.—A merger of several powerful Canadian terminal

We've never yet met a man who would be willing to give us his advice if we asked him for it.

We have just finished unloading a car of McDriv horses drawn buggies, also a car of new tractor binders.

Our Sales Line
From reports McDriv

tions is beginning to appear.

Every mother fears that her son will grow up and marry and she received the idea of a rubber ball covered with a light superstructure of steel.

The McDriv tractor buggies is the very latest development in grain harvesting equipment and has become very popular in Western Canada.

Genius McDriv's repair parts give superior service. You can always get the genuine ones stamped with the L.H.C. trade mark from us.

We put the 'U' in service. If we serve you well we will also serve you well.

Farmer Better'

and line elevator companies with a capital of \$60,000,000, has just been completed, it was learned today. The new company will be designated as the Canadian Consolidated Grain Company, with W. H. McWilliams as president, and Charles Bayles, secretary.

Total elevator capacity of 12,000,000 bushels will be owned and operated by the new company.

McKee's Garage, and five years ago he made and applied it to the gasoline tank on an old car sitting behind J. M. Moffatt's store on Friday evening last. The results obtained were more than up to expectations and Buck's hand and face were badly bruised. He is able to be around again a sadder and wiser gasoline expert.

LUSIER REALIZES AMBITION OF TWENTY YEARS STAND WHEN HE CONQUERS NIAGARA

Buffalo, July 5.—Albert Lusier, 34-year-old resident of Springfield, Mass., who realized an ambition of 20 years yesterday when he went over Niagara Falls in a rubber ball, was happy today in having his

VILLAGE OF CHAMPION

PUBLIC NOTICE

Except for bruises, Lussier was uninjured. He is one of a few men and women who have dared the mighty cataract and have come out safe.

Lussier said he was inspired to attempt thefeat when, as a boy, he saw Bobby French go over the falls in a barrel. Lussier later conceived the idea of a rubber ball covered with a light superstructure of steel.

Rolled and Bound
The occupant of the 758-pound fabric ball was towed out into the upper rapids and made both the falls and bounded through the upper rapids and over the Horsehoe Falls. A weight had been placed at Lussier's feet to keep him upright, but it became dislodged and he went over the head brick first.

In a short time later the ball was recovered a short distance below the falls, ripped open and Lussier hauled from within smiling. One thin thread still connected people clinging the shores.

His sister, Mrs. J. P. Cautiere, Sherrington, Conn., kissed him, other women tried to do likewise. A few succeeded.

"I have spent more than a year and over \$7,000 on my ball," Lussier explained. "I have succeeded and I am quite happy. I have demonstrated that my theory was correct. I could do it again, but I am sure, but once is plenty for me."

Bumped Quite a Bit
"As the ball had rolled down stream in the rapids, it was bumped about quite a bit. Just before I plunged over the falls I received an extra severe bump. It gave me a small bump on my right temple. Another bruise is on my right cheek and one on the left shoulder.

Mother had red hot sentons when I went over the falls. When I landed on the water at the bottom I got a jarring up. The ball struck the water and bounded back and down six times just like a ball being bounced on the sidewalk by a child. I went over the falls head first, but straps and pillows saved me from serious injury.

Mrs. Annie Taylor was the first to plunge over the falls and live to tell of her experience. She died in 1901. She made the trip in a wooden barrel. Bobby Leach went over in a steel barrel 17 years ago. George E. Stevens, of England, however, had his life in a barrel to go over the falls in an oak barrel made in England, the Drug Store, Friday, Aug. 3rd.

Notice is hereby given that bicycle riding is strictly prohibited on sidewalks in the Village of Champion.

Any person disregarding this notice will be prosecuted.

By Order,

A. McCULLOUGH, Mayor.

The Bible Teaches THAT Christ Gives Life

John 20:31—But these are written that ye might believe that Jesus is the Christ, the Son of God; and believing ye might have life through His name.

Therefore the Lutheran Church teaches:

Christ Saves You

ANOTHER EXCLUSIVE FEATURE

The silent Willys-Knight sleeve-engine plus a Belflex silenced chassis now make a completely

From the first turn of its sleeve-valve engine, the most powerful, most highly efficient and quietest in the world, the new Belflex sleeve-engine class—the Willys-Knight Six—to a mileage point still undreamed of in the history of motor efficiency, gain in smoothness and silence with every mile.

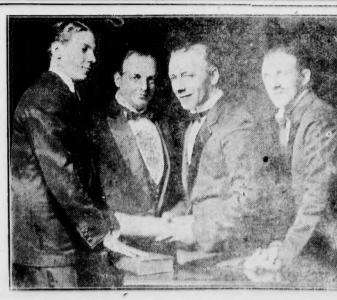

An now—Belflex Shakes—will now no longer be an exclusive Willys-Knight feature—a tremendous engineering advance over the noisy vibration and noisy metal shackles of other cars. Belflex provides a smooth ride and quietness and squeaks. It deadens road vibration, eliminates need for shock absorbers.

Belflex provides that the sprung parts of the car are insulated from the unsprung parts with a noise-absorbing material, which is air-filled and rubberized—thereby affording permanent chassis silence and smoothness and wear at every point of the car.

Examine the new "75" Willys-Knight Six, the most powerful and quietest sleeve-engine ever built. Leadership was never more definitely emphasized than in the introduction of the new performance ability of these fine cars.

Willys-Knight Great Six price from \$1250 to \$1500. The new Willys-Knight Six, compound car to the Willys-Knight Six, costs from \$1400 to \$1440. Prices f.o.b. factory. Taxes extra.
